Installing the SIM or USIM card

For phones with non-removable batteries:
1. Take the ejection pin out from print bundle;
2. Insert the ejection pin into the hole on/beside the tray to loosen the tray and pull out the tray from the slot gently;
3. Place the SIM or USIM card on the tray properly;
4. Insert the tray back into the tray slot.

For phones with removable batteries:
1. Remove the back cover and the battery;
2. Insert the SIM or USIM into the slot with metal contacts facing down;
3. Insert the battery and close the back cover.

Chapter 3: Basic Function

Applications

• If you need to launch an APP, just tap the icon in the home screen.
• Return to home screen: Press the home button.
• Switch to other home screens: Swipe left/right on the screen, or tap the white dot.
• Switch to recent used APPs: Press the menu button.

Gestures

You can operate icon, button, menu, and input keypad via gesture function.

• Tapping: To open an APP, to select a menu item, to press an on-screen button, or to enter a character using the keypad on the screen, tap it with your finger.
• Tapping and holding: Tap and hold an item or screen for more than 2 seconds to access available options.
• Swiping: Swipe to the left or right on the Home screen or Apps screen to view other panels. Swipe upwards or downwards to scroll through a webpage or a list of items, such as contacts.
• Spreading and pinching: Spread two fingers apart on a webpage, map, or image to zoom in a part. Pinch to zoom out.
• Dragging: To move an item, tap and hold it and drag it to the target position.
• Double-tapping: Double-tap on a webpage or image to zoom in. Double-tap again to return.

![Notification Panel Image]

**Notification Panel**

When there are icons shown in the notification bar, please drag down from the notification bar to open the notification panel and check the details of the information.

**Text Input**

Virtual keypad is available for text input purpose.

Below is an example showing how to use the input keypad. Detailed interface layout and operations depends on the keypad which you set by default.

**Opening the keypad**

1. Type the input field (such as typing a message) to open the keypad. There is cursor flashing in the input field.
2. Type the letter on the keypad.
* You can change the keypad in the notification panel. When you want to change the keypad please pull down the notification panel to select which keypad you want to use.
Chapter 4: Introduction of Detailed Functions

Phone

Making A Call and Answering a Call

Making A Call

Using the dial key
Dial the phone number: input the numbers directly, press the calling button to start calling.
Type the symbol " + " : Tap and hold number key “0” for seconds.
Type the pause symbol “ , “: Tap and hold key * for seconds.
Enter the voice mail box: Tap and hold number key “ 1 “ for seconds.

Making A Fast Call via T9 Dial Key

Search via T9 dial key support:
Search a contact via any letter of his / her English name;
Search a contact via any number of his / her phone numbers;
It will show the matched results with highlighted remark. You can make the call via typing the highlighted parts.
**Calling via “Recents”**

Latest calls will be found in “Recents”. You can make the same call via typing his/her name or phone numbers in the call log.

The arrow icon on the right is used to access the interface of detailed information. Missed calls will be remarked in red with calling times. It will show the attribution of strangers’ numbers.

**Calling via the “Contacts”**

If you want to call someone via “Contacts” please swipe to the left to access “Contacts” interface. You can choose the person’s name and press to dial his/her numbers.

**Emergency call**

You can make emergency call without SIM card or register to local network under the support of the network operator. For example: Type 112, type the calling button to make an emergency call.

*You can access the calling interface via typing the icon of the emergency call when the screen is locked by password number or PIN number.*
Operations During A Call

**Speaker Mode**
Use hands-free function to make a call. When blue-tooth is connected, “Hands-free” will be changed to “Connect to the device” which is used to switch the communication device during a call.

**Keypad**
Open keypad to dial phone numbers.

**Mute**
Mute your line.

**Record**
You can save a talk on the phone by tapping “Record” button.

**Notes**
Tap "Notes" button to open the note and manually type text. The note will be saved automatically.
Contacts
Tap "Contacts" to open “Contacts” interface and view contacts’ information.

Calling from The Third Party
When you receive a third party call during an on-going call, your phone will beep and show detailed contact information of the third party caller to remind you to decide "Answer" or "Ignore".

* Calling the third party or receiving a call from the third party is optional service. Please contact your network operator for more information.

Hold
When you want answer a call from the third party during on-going calling you can press "hold" to let current call wait. When you finish the call with the third party you can type "Resume call" to retrieve the held call.

Adding Call
You can jump to “Contacts” interface to add the other contact when you are calling on the phone. When the other call is answered your on-going calling will be held. In this situation you can choose “Switch” or “Merge call”. When you choose “Merge call" your phone will be change to “Conference call" mode.

Conference Call
If your network operator can support Multi-user talk you can set up a conference call with no more than 5 people.
Create conference call: Firstly make a call. Secondly type “Add calls” to call the other contact. The first call will be held in this situation. Thirdly type “Merge call“ to Merge all the contacts to the same line where all the people can hear each other and talk with each other. Repeat the second and the third step to add more calls. During the conference call you can type the buttons on the calling interface to edit conference call: there will be listed all the contacts on the conference call; You can stop calling with anyone or only talk with someone of the contacts.

Making A Call During Calling
Tap" Add calls"and call the other contact. Your first call will be held.
Tap" Merge call". All the calls will be merged to the same line so that all the people on the call will hear each other.
Repeat the second and third step to add more contacts.

Answering A Call

Answering
Swipe upwards “Answer” button to answer a phone.
Rejecting

Swipe upwards "Reject" button to reject a call. You can swipe upwards "Message" button to reject the call and send a message instead.

Changing the Gesture of Answering A Phone

Mute the ringtone of the calling: Press "Power" button or any "Voice" button, the ringtone will be mute, but you can still decide to answer the phone.

Recognising Strangers' Phone Numbers

The phone numbers of the sellers will be recognised as the name of the seller. For example: 10010 will be recognised as “China Unicom” automatically.
Sending An SMS

1. Tap “Compose” button.
2. Add a recipient
   Directly type a contact’s phone numbers; Type any letters or phone numbers of a contact, select the result from below speed search bar and press the icon “Add contacts” on the right to select which one you want from contacts list. If you choose contacts by mistake you can delete the wrong contacts by pressing the added contacts preview.
