- Dragging: To move an item, tap and hold it and drag it to the target position.

- Double-tapping: Double-tap on a webpage or image to zoom in. Double-tap again to return.

Notification Panel

When there are icons shown in the notification bar, please drag down from the notification bar to open the notification panel and check the details of the information.

Text Input

Virtual keypad is available for text input purpose.

Below is an example showing how to use the input keypad. Detailed interface layout and operations depends on the keypad which you set by default.

Opening the keypad

1. Type the input field(such as typing a message) to open the keypad. There is cursor flashing in the input field.
2. Type the letter on the keypad.

SwiftKey

Google Keyboard

Fleksy

Google Pinyin Input

* You can change the keypad in the notification panel. When you want to change the keypad please pull down the notification panel to select which keypad you want to use.

Chapter 4: Introduction of Detailed Functions

Phone

Making A Call and Answering a Call

Making A Call

Using the dial key

Dial the phone number: input the numbers directly, press the calling button to start calling.

Type the symbol” + “ : Tap and hold number key “0” for seconds.

Type the pause symbol “ , “: Tap and hold key * for seconds.

Enter the voice mail box: Tap and hold number key “ 1 “ for seconds.

Making A Fast Call via T9 Dial Key

Search via T9 dial key support:

Search a contact via any letter of his / her English name;

Search a contact via any number of his / her phone numbers;

It will show the matched results with highlighted remark. You can make the call via typing the highlighted parts.

Calling via “Recents”

Latest calls will be found in “Recents”. You can make the same call via typing his/her name or phone numbers in the call log.

The arrow icon on the right is used to access the interface of detailed information. Missed calls will be remarked in red with calling times. It will show the attribution of strangers’ numbers.

Calling via the “Contacts”

If you want to call someone via “Contacts” please swipe to the left to access “Contacts” interface. You can choose the person’s name and press to dial his/her numbers.

Emergency call

You can make emergency call without SIM card or register to local network under the support of the network operator. For example: Type 112, type the calling button to make a emergency call.

**You can access the calling interface via typing the icon of the emergency call when the screen is locked by password number or PIN number.*

Operations During A Call

Speaker Mode

Use hands-free function to make a call. When blue-tooth is connected, “Hands-free” will be changed to “Connect to the device” which is used to switch the communication device during a call.

Keypad

Open keypad to dial phone numbers.

Mute

Mute your line.

Record

You can save a talk on the phone by tapping “Record” button.

Notes

Tap “Notes” button to open the note and manually type text. The note will be saved automatically.

Contacts

Tap "Contacts" to open "Contacts" interface and view contacts' information.

Calling from The Third Party

When you receive a third party call during an on-going call, your phone will beep and show detailed contact information of the third party caller to remind you to decide "Answer" or "Ignore".

** Calling the third party or receiving a call from the third party is optional service. Please contact your network operator for more information.*

Hold

When you want answer a call from the third party during on-going calling you can press "hold" to let current call wait. When you finish the call with the third party you can type "Resume call" to retrieve the held call.

Adding Call

You can jump to "Contacts" interface to add the other contact when you are calling on the phone. When the other call is answered your on-going calling will be held. In this situation you can choose "Switch" or "Merge call". When you choose "Merge call" your phone will be change to "Conference call" mode.

Conference Call

If your network operator can support Multi-user talk you can set up a conference call with no more than 5 people.

Create conference call: Firstly make a call. Secondly type "Add calls" to call the other contact. The first call will be held in this situation. Thirdly type "Merge call" to Merge all the contacts to the same line where all the people can hear each other and talk with each other. Repeat the second and the third step to add more calls. During the conference call you can type the buttons on the calling interface to edit conference call: there will be listed all the contacts on the conference call; You can stop calling with anyone or only talk with someone of the contacts.

Making A Call During Calling

Tap "Add calls" and call the other contact. Your first call will be held.

Tap "Merge call". All the calls will be merged to the same line so that all the people on the call will hear each other.

Repeat the second and third step to add more contacts.

Answering A Call

Answering

Swipe upwards "Answer" button to answer a phone.

Rejecting

Swipe upwards "Reject" button to reject a call. You can swipe upwards "Message" button to reject the call and send a message instead.

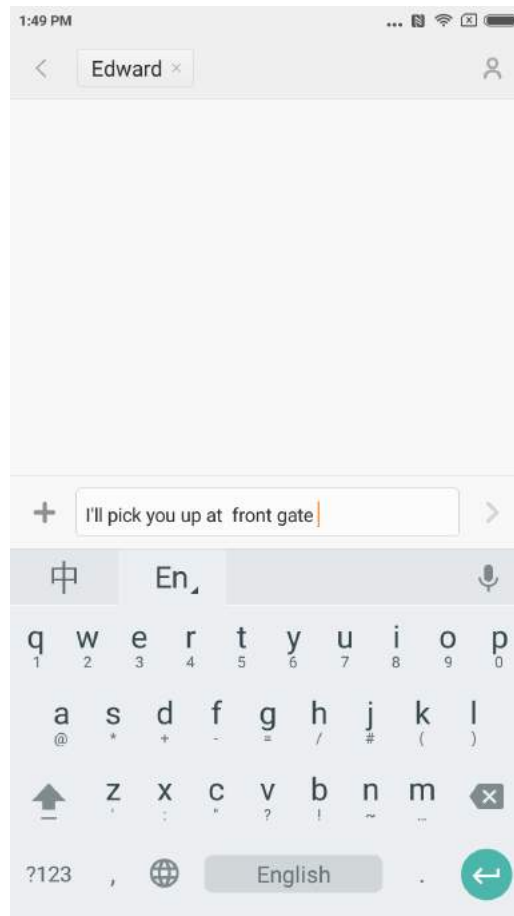

Changing the Gesture of Answering A Phone

Mute the ringtone of the calling: Press "Power" button or any "Voice" button, the ringtone will be mute, but you can still decide to answer the phone.

Recognising Strangers' Phone Numbers

The phone numbers of the sellers will be recognised as the name of the seller. For example: 10010 will be recognised as "China Unicom" automatically.

Sending An SMS

Editing An SMS

1. Tap “Compose” button.
2. Add a recipient

Directly type a contact’s phone numbers; Type any letters or phone numbers of a contact, select the result from below speed search bar and press the icon “Add contacts” on the right to select which one you want from contacts list. If you choose contacts by mistake you can delete the wrong contacts by pressing the added contacts preview.

3. Tap “Text message” to type text.

There is a remind of text’s capacity above “Send” button (It will appear if there is enough space). When there is more than 1 message in the mailbox it will show current messages’ quantity. If you attach picture, video or PPT. the message will be switched to MMS directly. Besides that it can support attaching emoticon, contacts’ information, mass name, every-day expressions.

4. Tap “Send” button.

Reading An SMS

When you receive a message there will be a remind with sender’s name, preview and receive time in the message list. You can read the completed message by typing the list. After reading the message you can also reply it to the sender immediately.

Reading MMS

When you receive MMS it will remind you to download the MMS via tapping “Download” button.

If MMS has a image or video attachment: Read the attachment through the “Gallery”.

If MMS has an audio attachment: It will be played through the system’s media player

Sending A Group SMS

It will show the sending progress such as “sending the message to which number contact”
If it failed to send a message to someone there will be a remind to ask the user to select retry or give up.

When all messages are sent you can check every sent message by pressing message list of the group.

Deleting An SMS Dialogue or A Message

You can access “edit mode” by tap and hold a message in the message list or message dialogue for seconds. In this situation you can select the message which you want to remove.

Manage Preview and Notifications

You can enable preview and light up the screen in the message’s settings.

If you enable the preview you can view it from locked screen, notifications bar, pop-up windows when you receive a new message.

If you enable light screen function the screen will be lighted automatically when you receive a new message so that you can read, reply, delete the message fast.

Search An SMS

You can click search bar to access search mode. You can search all messages’ text here.

Adding A Message to “Favorite”

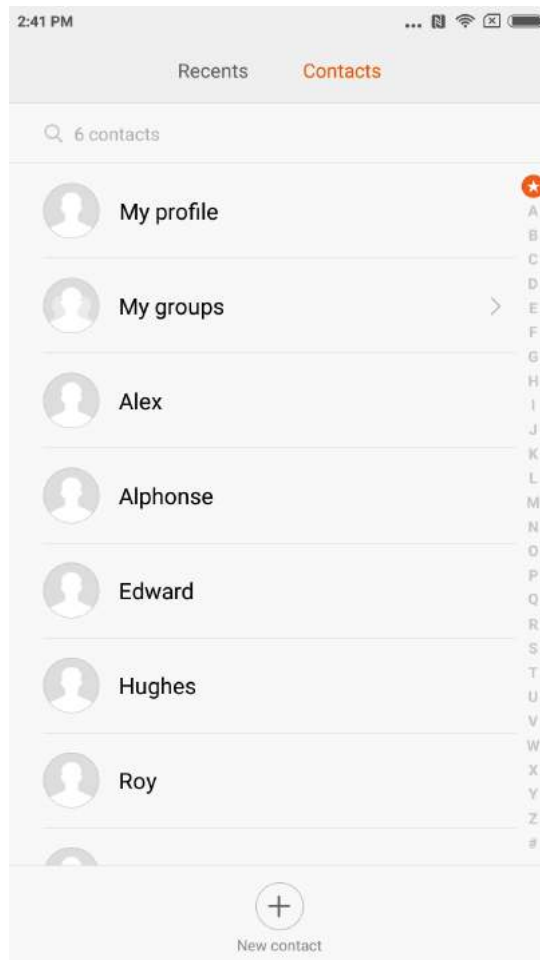

Tap any message in the message list for seconds to find “More” at the bottom of the menu. If you tap “Starred” it will add the message to favourites. The message in the favourite list will be remarked with a heart icon. If you tap the “Starred” icon again the message will be removed from favourite list.

All the favourite messages will be listed in the favourite list. User can forward the message or cancel the starred icon of the message.

Pin An SMS Dialog to The Top

Tap and hold any dialog in your SMS list and tap the “Pin” button in the bottom. This SMS dialog will be pinned to the top of the SMS dialog list.

Manage Contacts
